

CORNELIUS LOUIS NATHAN

corneliuslouis3112@gmail.com | linkedin.com/in/louisnath | louisnathan.vercel.app | +62 821 - 4004 – 1315

Surabaya, East Java

Software Engineer specializing in **Full-Stack Development** across **React.js**, **Node.js**, and **PHP (Laravel)** ecosystems. Proven capability in architecting robust **RESTful APIs**, implementing **scalable** design patterns, and managing relational databases. Experienced in delivering **end-to-end web applications**, from engineering **back-end logic** by resolving complex system constraint to designing **responsive front-end** interfaces. Focused on writing clean, maintainable, and **production-ready** code for dynamic technical environments.

EXPERIENCE

PT Citilink Indonesia

HCIS Developer Back-end - Project Intern

Tangerang

Feb 2026 – July 2026

- Engineered scalable **Laravel back-end** services with specified requirements for Human Capital Information Systems
- Implemented the **repository-service pattern** to optimize system architecture and maintainability
- Architected and deployed secure **REST APIs** to provide front-end collaboration

Google Student Ambassador

Student Ambassador for Surabaya State University

Surabaya

Sep 2025 - Dec 2025

- Orchestrated local seminars and workshops to educate students on **AI literacy** and applications
- Leveraged full usage of **Google Workspace** suite to streamline execution and maximize productivity
- Developed and executed social media campaigns about benefit and usage of **Google Gemini**

Asah Cohort Led by PT Dicoding Indonesia

React & Back End with AI - Independent Study

Surabaya

Aug 2025 - Dec 2025

- Designed and developed responsive **React.js front-end** for final **capstone** project, "Ditanyain"
- Collaborated in team environment to integrated "Ditanyain" with **back-end REST APIs**
- Secured **Top 12% Best Capstone Project** and achieved the **highest** overall score in final judging

PT Ankara Gala Wisesa (Study First)

Web Developer - Remote Intern

Surabaya

Jun 2025 - Aug 2025

- Transformed **Figma** or **Visily wireframe** into functional responsive website pages using **Elementor**
- Structured responsive layouts to ensure optimal performance on mobile and table devices
- Diagnosed and resolved issues to maintain structural and platform stability

Himpunan Mahasiswa Teknik Perpipaan (PPNS)

Front-End Developer - Freelance

Surabaya

Jun 2025 - Jul 2025

- Developed responsive **React.js front-end** for Pipeline Engineering Student Association portal
- Integrated **React.js UI components** seamlessly with **Laravel backend REST APIs**
- Managed code integration and version control pipelines utilizing **Git/GitHub** workflows

Surabaya State University

Practicum Co-Assistant

Surabaya

Aug 2024 - Nov 2025

- Mentored new students in learning **core programming logic** and **data structure** concepts using **C++**
- Authored comprehensive technical documentation and **C++** learning modules for academic curriculum
- Evaluated new students understanding and implementation logic using strict academic grading metrics

Surabaya State University

Software Developer Laboratory Assistant

Surabaya

Aug 2024 - Nov 2025

- Facilitated practical software development sessions and provided direct technical troubleshooting
- Maintained and responsible for hardware and software environments to ensure optimal conditions
- Managed scheduling and operational workflows for laboratory management

EDUCATION

Surabaya State University

Bachelor of Informatics Engineering | GPA : 3.96 / 4.00

Surabaya

Aug 2023 - Present

- Focused on core engineering principles, including **OOP** and **database management**
- Directed academic specialization toward **web application architecture**, **RESTful API** design, and **relational database**
